DATASHEET / BROCHURE

Produce high volumes of superior-quality textiles quickly and consistently while keeping costs low

Create high-quality textiles including clothing, sportswear, home furnishings as well as soft signage and flags with this superior printing package. Released alongside a new high-density HDK Black ink and sublimation papers, the SC-F9200 is part of an end-to-end printing package, which includes Wasatch software, meaning users can get started straight away to deliver a range of textiles with the best possible results.

Achieve superior-quality results

High-quality textiles with superb colour and clarity can be created quickly thanks to Epson's PrecisionCore technology and two TFP printheads. These work in tandem with a new high-density HDK Black ink, the latest addition to the UltraChrome DS ink range, which has been developed for use in textile printing to produce deep, neutral blacks and dense shadows.

Ensure high productivity

Users will benefit from two high-capacity ink supply systems meaning longer, uninterrupted print runs and less time spent replenishing inks. Additionally, a large after heater and optional air dryer means products are in optimal condition for winding on to the highly-accurate take-up system.

Cut costs

Epson realises how important it is to keep overall printing costs down and with Epson UltraChrome inks, it is easy to achieve a very low cost per square metre. To help offer businesses significant cost savings, the SC-F9200 is available with Print & Save¹, Epson's professional managed print service package, which allows tighter budget control and helps reduce overstocking.

Exceptional service and support

The SC-F9200 comes with a one year warranty as standard with the option to extend further with Epson CoverPlus warranty options. These options include an Epson rolling one-year warranty, meaning customers can pay for a year at a time and don't have to pay for a long term upfront.
